That body of rules, principles and customs which have been received from our ancestors, and by which courts have been guided in judicial decisions. The evidence of this law is to be found in the reports of those decisions, and the records of the courts. Some of these rules may have originated in edicts or statutes which are now lost, or in the terms and conditions of particular grants or charters; but it is most probable that many of them originated in judicial decisions founded on natural justice and equity, or on local customs.

This court is variously constituted in different states, and its powers are defined by statutes. It has jurisdiction of civil causes, and of minor offenses; but its final jurisdiction is very limited; all causes of magnitude being removable to a higher Court by appeal or writ of error.

CREDIBILITY, n. [Fr. crédibilité, from L. creditibilitas.] Credibility; the quality or state of a thing which renders it possible to be believed, or which admits belief, on rational principles; the quality or state of a thing which involves no contradiction, or absurdity. Creditibility is less than certainty, and greater than possibility; indeed it is less than probability, but is nearly allied to it. [See Credible.]

CREDIBLE, a. [L. creditibilis.] That may be believed; worthy of credit. A thing is credible when it is known to be possible, or when it involves no contradiction or absurdity; it is more credible, when it is known to come within the ordinary laws or operations of nature. With regard to the Divine Being and his operations, every thing is credible which is consistent with his perfections, and supported by evidence or unimpeachable testimony, for his power is unlimited. With regard to human affairs, we are more willing to accept things barely possible, but to things which come within the usual course of human conduct, and the general rules of evidence.

The purchaser takes what he buys on crédit, and the seller believes in the solvency and probity of the buyer.

Public credit, the confidence which men entertain in the ability and disposition of a nation, to make good its engagements with its creditors; or the estimation in which individuals hold the public promises of payment, whether such promises are expressed or implied. The term is also applied to the general credit of individuals in a nation; when merchants and others are wealthy, and punctual in fulfilling engagements, we apply to them the terms of honor and fidelity, or when transfers of property are made with ease for ready payment. So we speak of the credit of a bank, when general confidence is placed in its ability to redeem its notes; and the credit of a mercantile house rests on its supposed ability and probity, which induce men to trust to its engagements.

Cherish public credit. Washington.

When the public credit is questionable, it raises the premium on loans.

But in English, demand is now seldom used in that sense, and rarely indeed can the French demander be rendered correctly in English by demand, except in the case of the seller of goods, who demands, asks, requires, a certain price for his wares. The common expression, a king sent to demand another king's daughter in marriage, is improper.

Hence demons became the objects of worship. It was supposed also that human spirits, after their departure from the body, became demons, and that the souls of vir
tuous men, if highly purified, were exalted from demons into gods. In the scriptures, the English word is not used, but the Greek daemon is rendered devil, and sometimes at least improperly; for nothing is more certain than that different beings are intended by ὅπερος and δαίμων. DESPUSE, v. t. despise. [I doubt whether this word is formed from the L. despice, despise. In Sp. and Port. pisar is to tread down, and to despise. It appears to be of different origin from despise, and to be formed on the root of the Spanish word. We probably see its affinities in Sp. piso, a rammer, and the L. piso, to stamp, whence pistillum, Eng. pestle, piston, &c. The primary sense then is to thrust, drive, and hence to cast off or tread down, to despise.

tion of action, and despair sometimes impels to violent and rash precipitance.

The eagle is one of the largest species of birds of prey. It has a keen sense of sight and hearing. In ancient times, the eagle was often associated with gods and goddesses, symbolizing power, freedom, and strength.

The eagle's eye is one of the most powerful in the animal kingdom. It has a sharp vision, allowing it to spot prey from a great distance. The eagle's hearing is also highly developed, enabling it to detect sounds that are not audible to other animals.

Eagles have a unique vocalization, known as a hoot. This sound is produced by the eagle's throat, which is lined with a special structure called a gooch. The gooch allows the eagle to produce a wide range of sounds, including the familiar hoot.

In ancient Greek mythology, the eagle was associated with the god Zeus. The eagle was believed to be able to carry Zeus's messages to the gods, and it was often depicted as a messenger of the gods.

In modern times, the eagle has become a symbol of freedom and independence. The United States of America has the eagle on its national emblem, the Great Seal of the United States. The eagle is also a symbol of strength and courage, often used in military insignia.

The eagle's diet consists mainly of small mammals, birds, and occasionally fish. Eagles are powerful hunters, using their sharp talons and beak to capture their prey. Their wings are broad and powerful, allowing them to soar through the air with ease.

Eagles are found throughout the world, with over 100 species recognized. They are found in a variety of habitats, from deserts to forests. Each species of eagle has its own unique features and behaviors, making them fascinating subjects for study and observation.

Overall, the eagle is a remarkable bird, one that has captured the imagination of people for thousands of years. Its strength, grace, and beauty serve as a reminder of the majesty of nature and the power of the natural world.

ELECTRICIAN, n. A person who studies, practices or teaches the science of electricity.

ELECTRICITY, n. The operations of a very subtil fluid, which appears to be diffuse throughout most bodies, remarkable for the rapidity of its motion, and one of the most powerful agents in nature. The name of the phenomenon is given to the operations of this fluid, and to the fluid itself. As it exists in bodies, it is denominated a property of those bodies, though it may be a distinct substance, invisible, intangible and imponderable. When an electric body is rubbed with a soft dry substance, as with woolen cloth, silk or fur, it attracts or repels light substances, at a greater or less distance, according to the strength of the electric virtue; and the friction may be continued, or increased, till the electric body will emit sparks or flashes resembling fire, accompanied with a sharp sound. When the electric fluid passes from cloud to cloud, from the clouds to the earth, or from the earth to the clouds, it is called lightning, and produces thunder. Bodies which, when rubbed, exhibit this property, are called electrics or non-conductors. Bodies, which, when excited, do not exhibit this property, as water and metals, are called non-electrics or conductors, as they readily convey electricity from one body to another, at any distance, and such is the rapidity of the electric fluid in motion, that no perceptible space of time is required for its passage to any known distance.

Cavallerio. Encyc.

It is doubted by modern philosophers whether electricity is a fluid or material substance. Electricity, according to Professor Silliman, is a power which causes repulsion and attraction between the masses of bodies under its influence: a power which causes the heterogeneous particles of bodies to separate, thus producing chemical decomposition; one of the causes of magnetism.

EVE, n. The consort of Adam, and mother of the human race; so called by Adam, because she was the mother of all living. In this case, the word would properly belong to the Heb. ינה. But the Hebrew name is ינה havah or chavah, coinciding with the verb, to shew, to discover, and PARKhurst hence denominates Eve, the manifestor. In the Septuagint, Eve, in Gen. iii. 20, is rendered έανη, life; but in Gen. iv. 1, it is rendered Ευαν, or Ευαν. The reason of this variation is not obvious, as the Hebrew is the same in both passages. In Greek, Eve is Ευαν. In the Chickasaw language of America, a wife is called awah, says Adair.

Thus when a grant of land is made to A for twenty years, and after the determination of that term, to B and his heirs forever; A is tenant for years, remainder to B in fee. In this case, the estate of B is in expectancy, that is, waiting for the determination of the estate for years. A reversion is the residue of an estate left in the grantor, to commence in possession after the determination of a particular estate granted out by him. As when A leases an estate to B for twenty years; after the determination of that period, the estate reverts to the lessor, but during the term the estate of the lessor is in expectancy. Blackstone.

If the chances of receiving or not receiving a hundred dollars, when an event arrives, are equal; then, before the arrival of the event, the expectation is worth half the money. Expectation differs from hope. Hope originates in desire, and may exist with little or no ground of belief that the desired event will arrive. Expectation is founded on some reasons which render the event probable. Hope is directed to some good; expectation is directed to good or evil.

From the use of cattle in transferring property, or from barter and payments in cattle, the word came to signify money; it signified also goods, substance in general. The word belongs to Class Bg, but the primary sense is lost or only preserved in English.

1. A reward or compensation for services; recompense, either gratuitous, or established by law and claimed of right. It is applied particularly to the reward of professional services; as the fees of lawyers and physicians; the fees of office; clerk's fees; sheriff's fees; marriage fees, &c. Many of these are fixed by law; but gratuities to professional men are also called fees.

FEE, n. [This word is usually deduced from Sax. feoh, cattle, property, and fee, a reward. This is a mistake. Fee, in land, is a contraction of feud or fi: or fi: or from the same source; lit. feof, Sp. feo, faith, trust. Feo, a reward, from feoh, is a Teutonic word; but fee, feud, fee, are words wholly unknown to the Teutonic nations, who use, as synonymous with them, the word, which, in English, is loan. This word, fee, in land, or an estate in trust, originated among the descendants of the northern conquerors of Italy, but it originated in the south of Europe. See Feed.]

Primarily, a loan of land, an estate in trust, granted by a prince or lord, to be held by the grantees on condition of personal service, or other condition; and if the grantee or tenant failed to perform the conditions, the land reverted to the lord or donor, called the landlord, or lord landlord, the lord of the loan. A fee then is any land or tenement held of a superior on certain conditions. It is synonymous with fi: and feudal.

All the land in England, except the crown lands, is of this kind. Fees are absolute or limited. An absolute fee or fee simple is land which a man holds to himself and his heirs forever, who are called tenants in fee simple. Hence in modern times, the term fee or fee simple denotes an estate of inheritance; and in America, where lands are not generally held of a superior, a fee or fee-simple is an estate in which the owner has the whole property without any condition annexed to the tenure. A limited fee is an estate limited or clogged with certain conditions; as a qualified or base fee, which ceases with the existence of certain events. A conditional fee, which is limited to particular heirs.

In the U. States, an estate in fee or fee-simple is what is called in English law an allotted estate, an estate held by a person in his own right, and descendible to the heirs in general.

FELONIOUSLY, adv. In a felonious manner; with the deliberate intention to commit a crime. Dictionaries for capital offenses must state the fact to be done feloniously.

FELONY, n. [See Felon.] In common law, any crime which incurs the forfeiture of lands or goods. Treason was formerly comprised under the name of felony, but is now distinguished from crimes thus denominated, although it is really a felony. All offenses punishable with death are felonies; and so are some crimes not thus punished, as suicide, homicide by chance, or otherwise for the private interest of the perpetrator. Capital punishment therefore does not necessarily enter into the true idea or definition of felony; the true criterion of felony being forfeiture of lands or goods. But the idea of felony has been so generally connected with that of capital punishment, that law and usage now confirm that connection. Thus if a statute makes an attempt to commit a felony, it is understood to mean a crime punishable with death.

benefit or purpose.

xng for.

So in the phrases, looking for, sly for a truth, without having examined, what is there that he may not embrace for truth? I judge, he makes his sun to rise on the evil and on the good.

In such sentences, for has the sense of because, by reason that, as in No. 14; with this difference that in No. 14, the word precedes a single noun, and here it precedes a sentence or clause: but the phrase is plain enough, and no elliptical, for this cause or reason, which, following, he makes his sun to rise, &c. In Romans, xiii. 6, we find the word in both its applications, "For, for this cause ye pay tribute also—" the first for referring to the sentence following; the latter to the noun cause.

In Port. foragido is a vagabond, and forrage is to waste, to ravage.

In Sw. and Dan. the verbs signify not only to travel, but to raise. Whether the latter word raise is of the same family, may be doubtful; but the others appear to belong to one radix, coinciding with the Syr. GUILT, n. guilt. [Sax. gylt, a crime, and a debt, connected with gyltan, to pay; or it is from the root of D. and G. schuld, Dan. skyl, a debt, fault, guilt. See Shall, Should.]

If the word is from gyltan, gyl-dan, to pay, it denotes a debt contracted by an offense, a fine, and then came the present signification.

1. Criminality: that state of a moral agent which results from his actual commission of a crime or offense, knowing it to be a crime, or violation of law. To constitute guilt there must be a moral agent enjoying freedom of will, and capable of distinguishing between right and wrong, and a willful or intentional violation of a known law, or rule of duty. The guilt of a person exists, as soon as the crime is committed; but to evince it to others, it must be proved by confession, or conviction in due course of law. Guilt renders a person a debtor to the law, as it binds him to pay a penalty in money or suffering. Guilt therefore implies both criminality and liability to punishment. Guilt may proceed either from a positive act of breach of law, or from voluntary neglect of known duty.

2. Criminality in a political or civil view; exposure to forfeiture or other penalty.

H, is the eighth letter of the English Alphabet. It is properly the representative of the Chaldean, Syriac and Hebrew ꧃, which is the eighth letter in those alphabets. Its form is the same as the Greek ḫ. It is not strictly a vowel, nor a vocalization; but the mark of a stronger breathing than that which precedes the utterance of any other letter. It is pronounced with an expiration of breath, which, preceding a vowel, is perceptible by the ear at a considerable distance. Thus, harm and arm, heart and ear, heat and eat, are distinguished at almost any distance at which the voice can be heard. H is a letter sui generis, but as useful in forming and distinguishing words as any other.

In our mother tongue, the Anglo-Saxon, and other Teutonic dialects, h sometimes represents the L, c, and the Gr. x; as in horn, L. cornu, Gr. αἴσχος; hide, G. haut, Sw. hud, D. haut, Dan. hud, L. cutis; Sax. hītian, L. clīnum, Gr. αἴσχος, to lean; L. celum, to conceal, Sax. helan, G. hülen, Dan. hælter. In Latin, h sometimes represents the Greek υ, as in halo, Gr. υατερον, hīniio, υηνος. In the modern European languages, it represents other guttural letters.

In English, h is sometimes mute, as in honor, honest; also when united with g, as in right, fight, brought. In which, what, which, whom, and some other words in which it follows w, it is pronounced before it, hwath, huvat, &c. As a numeral in Latin, H denotes 200, and with a dash over it H 200,000.

As an abbreviation in Latin, H stands for homo, homines, &c. As a name, it stands for the first or long sound of a, it is used as a question, and is equivalent to "What do you say?" When repeated, ha, ha, it is an expression of laughter, or sometimes it is equivalent to "Well!"

Praise ye Jehovah; give praise to God; a word used in songs of praise, or a term of rejoicing in solemn ascriptions of thanksgiving to God. It is used as a noun, or as an exclamation.

[This word is improperly written with j, in conformity with the German and other continental languages, in which j has the sound of y. But to pronounce the word with the English sound of j destroys its beauty. The like mistake of the sound of j in Jehovah, Jordan, Joseph, has perverted the true pronunciation, which was Jeho- rah, Yordan, Joseph. This perversion must now be submitted to, but in Hallelujah it ought not to be tolerated.]

HEAT, n. {Sax. heat, ha:t ; B. hitte; G. hitze; Sw. hitta; D. hede; L. cæsarius, for hastus, heat, tide, words, is to stir, to rouse, to raise, to agitate, from the action of driving, urging, stimulating, whence Sw. hitta, Dan. hedder, to excite, to set on dogs. See Class Gd. No. 39, and others. It may be further added, that in W. cas is hatred, a rejection, or cause to be hot; as, to heat an oven or furnace to heat iron.

1. Heat, as a cause of sensation, that is, the matter of heat, is considered to be a subtil fluid contained in a greater or less degree in all bodies. In modern chemistry, it is called caloric. It expands all bodies in different proportions, and is the cause of fluidity and evaporation. A certain degree of it is also essential to animal and vegetable life. Heat is latent, when so combined with other matter as not to be perceptible. It is sensible, when it is evolved and perceptible. Lavoisier. Ensay.

2. Heat, as a sensation, is the effect produced on the sentient organs of animals, by the passage of caloric, disengaged from surrounding bodies, to the organs. When we touch or approach a hot body, the caloric or heat passes from that body to our organs of feeling, and gives the sensation of heat. On the contrary, when we touch a cold body, the caloric passes from the hand to that body, and causes a sensation of cold. Lavoisier.

2. Of him. Thus in Alfred's Orosius, "Sume for his ege ne dorstan." Some for fear of him durst not; literally, for his axe, for me of him. Lib. 3. 8. In this instance, his does not express what belongs to the antecedent of his, [Philip] but the fear which others entertained of him.

3. The present use of his is as a pronoun adjective, in any case indifferently, corresponding to the L. suus. Thus, tell John his papers are ready. I will deliver his papers to his messenger. He may take his son's books. When the noun is omitted, his stands as its substitute, either in the nominative or objective case. Tell John this book is his. He may take mine and I will take his.

4. His was formerly used for its, but improperly, and the use has ceased.

5. It was formerly used as the sign of the possessive. The man his ground, for the man's ground. This use has also ceased.
